SKY CLIMBER
"Access Innovations Since 1955"

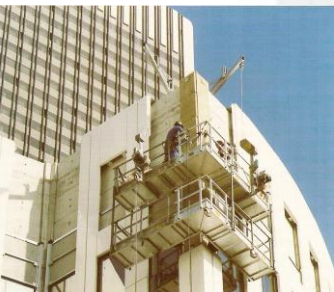

SKY STAGE 500 / 505

The **SKY CLIMBER® SKY STAGE** is designed for use with any **SKY CLIMBER®** powered rigging hoist. The combination forms a complete modular heavy duty suspended access system and is a cost effective complement to the range of **SKY CLIMBER®** products. Apart from suspension stirrups, which are galvanised, all components are aluminium alloy.

Operate in your work environment

- Sandblasting
- Commercial Restoration
- Painting
- Masonry
- Window Cleaning
- General Building Maintenance
- Off Shore oil rigs
- Boiler and digester Maintenance
- Ship Maintenance
- Caulking
- ...

Modular

Using 1, 2 or 3 m modules, the **SKY STAGE** can be assembled to achieve a maximum length of 12 m between suspension centres. As an alternative walk through stirrups can be used, combined with end guard rails to give better access to corners of buildings, etc. In combination with available corner sections and hinges, any configuration can be assembled. 1 or 2 m sections, combined with a walk through stirrup, forming a single hoist operating platform.

Economical

The **SKY CLIMBER® SKY STAGE** is providing a very cost effective solution to many access problems.

Safety

All Standard configurations are CE (EN1808) approved, meeting and or exceeding world safety regulations.

Interchangeability

Any type of **SKY CLIMBER®** rigging hoist with standard safety equipment, such as **LOCK, SKY GRIP** etc. will fit any suspension stirrup.

SS 505 for boiler applications

SKY STAGE 505 platforms are made of specially designed split deck sections which can be introduced through any manhole having an ellipse size of 597 x 406 mm. The platforms are modular and are delivered in deck and guardrails sections to assemble the required platform.

Count on SKY CLIMBER®...backed by more than 55 years industry experience, known for many innovative, industry first achievements, leading a safe, fast and strong way into the future.

SKY STAGE 500/505 a proven value for more than 35 years!
